

**Which region would likely have the greatest amount of biodiversity? A.
a grassland region with one ecosystem, which supports very large
populations of a few different species**

**B.
a coastal region with three ecosystems, each of which supports many
different species**

**C.
a cave region with one ecosystem, which supports small populations of
many different species**

**D.
a mountainous region with two ecosystems, each of which supports a few
different species**

Answer:

The correct answer would be B. a coastal region with three ecosystems, each of which supports many different species

Biodiversity refers to the sum up of all the variety or type of species of living organisms inhabiting a particular area.

It includes all living organisms whether plant, animal, insect, or bacteria.

The more the variety of living organisms present in an area the more would be its biodiversity.

Similarly, the coastal region has three types ecosystem each of which supports different types of species.

Thus, this region would have the most variety of organisms.

Hence, it would have maximum biodiversity as compared to the other regions.

I believe b, but I could be wrong, so get another opinion!

This table shows information from a survey about the type of coffee people prefer and whether they like it hot or cold.

A population of lizards decreases exponentially at a rate of 12.5% per year. What is the equivalent monthly rate to the nearest hundredth of a percent? a. 0.20%

b. 1.04%

c. 1.11%

d. 1.23%

Economist A believes that the economy is self-regulating. Economy B believes that wages and prices are inflexible downward. economist C believes that the AS curve is vertical. economist d believes crowding out is complete. which economist is more likely to advocate for expansionary?

Does antibiotics help kill the common cold??

Describe how the theme in the “man who was almost a man” interact and build on each other.

Points!! Get Your Points!!! Dirk can clean a playground in 5 hours. Geralyn can clean a playground in only 4 hours.

Which of the following can be used to determine the amount of time it would take for Dirk and Geralyn to clean a playground together?

A.) $(1/5) + (1/x) = (1/4)$

B.) $(1/x) + (1/4) = (1/5)$

C.) $(1/5) + (1/4) = (1/x)$

D.) $(1/4) + (1/5) = (x/9)$

Jeremy has $4\frac{1}{2}$ cup of ice tea what's to divide ice tea into $\frac{3}{4}$ cup servings youth model to find the number of servings he can make

$(5 \times 3) + (n \times 4) = 5(3 + 4)$ is what

PLEASE HELP!!! One of the similarities between Yeat's two poems, "The Second Coming" & "An Irish Airman Foresees His Death" is

A. both follow a simple rhyme scheme

B. addresses the single fate of one man.

C. compels the reader to reassess the world the live in

Assume that at the end of the next year, Company A will pay a \$2.00 dividend per share, an increase from the current dividend of \$1.50 per share. After that, the dividend is expected to increase at a constant rate of 5%. If an investor requires a 12% return on the stock, what is the value of the stock?

A train averages a speed of 90 miles per hour across the plains and 37.5 miles per hour through the mountains. if a trip of 300 miles took 3 hours and 48 minutes, how much of it was through the mountains?

How are the muslim and chinese calendar different

PLEASE HELP!! FIRST CORRECT ANSWER GETS BRAINLIEST!!!! Decide which problem is illustrated by the following sentence:

It was voted that all members would pay a small increase in dues.

A.

Improper use of voice

B.

Wordiness

C.

Unclear meaning

Which phrase below best demonstrates parallel structure in the following sentence? Turning off the lights, blowing out the candles, and _____ are important steps for home safety.

A. unplug electrical devices
